

Comstar Business Consulting Inc - Oracle e-Business Suite Support

Business Consultancy | Integrated support for multiple Oracle eBusiness Suite customers

Oracle Enterprise Systems are the centre of many businesses. Across sectors, they're the structure behind the management of integral processes - from finance to HR to production. Proper maintenance of these kinds of systems calls for a set of specific IT skills. Comstar Business Consulting work with their customers to help inhouse teams leverage the power of Oracle.

The Challenge

Comstar came to clckwrk for technical expertise. They were looking to gain market share by building a complete set of consultancy services to offer their customers. Partnering with Comstar to provide integrated support, our Managed Services team took on the technical side of systems management and maintenance.

We provide a highly skilled technical helpdesk, and our consultancy team fits perfectly alongside Comstar's own services. We manage environments hosted in AWS using native tools and techniques that allow us to stay ahead of the game. And we don't just replicate the previous on-premise static infrastructure - we innovate. We're all about rethinking the way that Oracle hosting and management works, for the better.
